

We are looking for an excellent student interested in combining biogeochemistry and remote sensing in a research on:

## Geochemical – microbial relation in the Dead Sea sinkholes

The study will be carried out in the Department of Marine Geosciences at the University of Haifa and the Geological Survey in Jerusalem.

Requirements:

- \*BSc in earth sciences or any related field.
- \*Field and lab work
- \*Excellent English and wish to work in an international and interdisciplinary team

Please address enquiries to:
