

Blue biotechnologies and Sustainable mariculture

POSITION CALL FOR APPLICATIONS

The Department of Blue biotechnologies and Sustainable mariculture, the Leon H. Charney School of Marine Sciences at the University of Haifa, Israel, invites applications from outstanding scientists for tenure-track faculty positions in mariculture, carbon capture, renewable energy, natural products, artificial intelligence, agriculture engineering and related fields.

We encourage interdisciplinary applications from scientists in related fields with a strong interest in marine biotechnology and focused plans for blue biotechnologies and sustainable mariculture -related research. Candidates should have a Ph.D. degree and postdoctoral experience as well as a strong track record in research and teaching. Successful candidates will be expected to carry out independent research programs, participate in collaborative projects within and outside the Leon H. Charney School of Marine Sciences and teach introductory and advanced courses at the undergraduate and graduate levels in their respective field. The Leon H. Charney School of Marine Sciences is a unique initiative on a global scale, applying an interdisciplinary approach to studying the sea, its occupants and how the sea impacts – and is affected by – human society.

Applications should include:

1. A one-page cover letter with the applicant's credentials.
2. A CV
3. List of publications
4. Research statement (3 pages).
5. Teaching statement (1-2 pages).
6. Names of three leading scientists who can send recommendation letters
7. Three of the applicant's best journal publications.

Final decisions are subject to the candidate's proficiency and experience, acceptance by the Department resource availability, and the approval of the Rector of the University. Please send applications to:

Dr. Danny Morick, Head of the Blue biotechnologies and Sustainable mariculture department
